Create an account in SendGrid

The screenshot displays the Twilio SendGrid dashboard for a user named Sahasra Venkatesh. The left sidebar contains navigation links for Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, Settings, and Twilio SMS. The main content area features a welcome message and a blue banner that reads 'Send your first emails with Twilio SendGrid'. Below this, the 'Create a sender identity' section explains that a sender identity is the 'from' email address and provides two options: 'Create a Single Sender' (highlighted in blue) and 'Authenticate a domain instead'. An illustration shows an email header with 'Your Business' as the sender and 'john.doe@your_business.com' as the email address. At the bottom, a 'Send your first email' section includes a lock icon and a message: 'Please create a sender identity before sending your first email.'

Welcome, Sahasra!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

[Create a Single Sender](#) [Authenticate a domain instead](#)

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.

Your Business <john.doe@your_business.com>
to me

Send your first email

Please create a sender identity before sending your first email. 🔒
